COMPACT WORKTOP COLLECTION

▶ GENTAS COMPACT WORKTOPS

Gentas Compact Worktops are produced in 12mm thick solid compact HPL according to DIN-EN-438. Most important features are easy to clean, high impact and moisture resistance for all types of kitchens. The collection also has different core colours as beige, grey, white and black. This colour through design creates a perfect edge appearance.

The standard dimensions for Solid Compact are 1400x3660/4200mm or 1300x3050mm

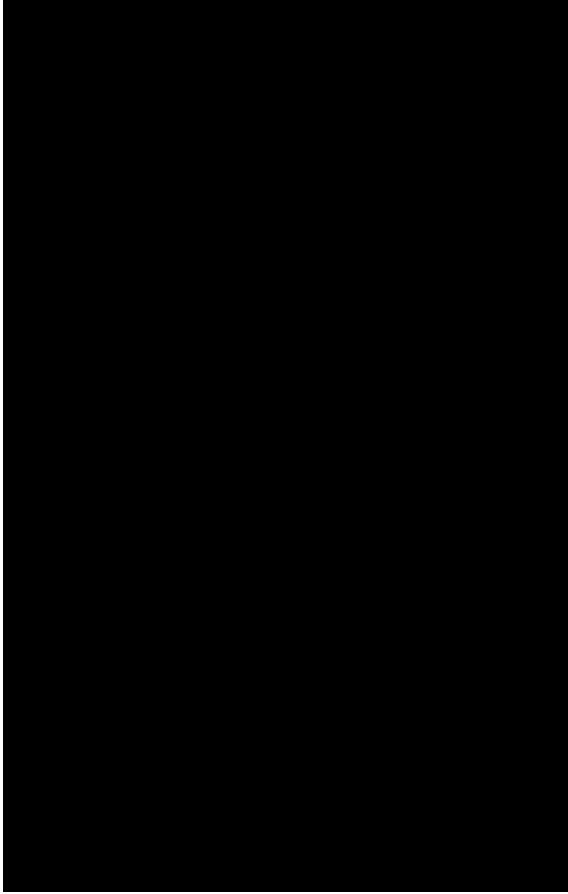

▶ GENTAS COMPACT WORKTOPS – HIGHLY RESISTANT TO ...

Melamine is the reason for the high scratch and wear resistance of Gentas-HPL surface. The high impact resistance of the material is due to the solid core. These properties also explain the high resistance of HPL to chemicals and heat.

▶ CLEANING AND CARE INSTRUCTIONS

It's very easy to clean and care for Gentas Worktops. Daily cleaners or a moist cloth is enough. Heavy dirt can be removed with an organic solvent such as methylated spirits or alcohol.
